TOP 10 LED T8 Retrofit Candidates

LED T8 lamps are energy efficient, offer a longer life time, and provide instant-on lighting vs. some traditional lamps that require a “warm-up time.” Utility rebates and government incentive may help boost the bottom line. So, who should be deploying it? Here is the top 10 list for your reference:

1. Federal and local government buildings
2. Hospitals & health care facilities
3. Manufacturing facilities (especially those that operate 24 hrs)
4. Commercial buildings managed by professional property management
5. Office buildings that employ in house maintenance staff
6. Universities & public schools: for classrooms, dormitories & gymnasiums
7. Supermarkets & big-box retail chains: storage and prep areas or refrigerated rooms
8. Retail chain stores
9. Fast food/coffee/restaurant chain stores
10. Subterranean locations such as tunnels, bus stations or storage areas

Now there is a choice when you retrofit with LED lamps in existing fixtures. Retrofit projects that have lighting fixtures with shunted tombstones can use the Aleddra **EasiRetrofit** LED T8 tube with DSS (Double Safety Switch), saving on the cost of new fixtures. However if you need to replace those fixtures that are more than 10 years old, you can be assured that our single-ended LED T8 lamp is cost effective, which gives you the “Aleddra Advantage.” If you own or operate any of these facilities, why not lower your energy bill with LED lights and reduce your project cost with rebate and incentive while they are still available. If you need help to get started on the right track, send your inquiry to sales@aleddra.com.

LED is FUN Sunrise LED Lamp

If you like to wake up with natural sun light, especially when the sun doesn't rise at the time when you want to get up, you would appreciate this LED lamp that is a clock and a light. It will set its light level according to time of the day, ambient light, or your mood, by either a remote control or your touch. It also comes with natural sounds such as birds, frogs, owls, ocean, and wind, to let you sleep by the seaside and wake up in a forest. More information on 

(Disclaimer: Aleddra has no business affiliation with the manufacturer of LED Clock.)
