

Aleddra EasiRetrofit™ LED T8 Lamp Qualified for Con Edison Rebate

In recognizing the advancement of LED T8 technology, Con Edison, one of the largest utility companies in US, announced recently it is now able to accept LED tubes with internal drivers for custom rebate program on a case-by-case basis. The requirements are:

- LED T8 with internal driver design must meet all code & safety requirements.
- Existing fixture retrofit and new fixture replacement are both applicable.
- The fixture must use non-shunted tombstones.

Aleddra's LED T8 lamps with internal drivers meet these requirements nicely. Its **EasiRetrofit™** LED T8 tube with DSS (Double Safety Switch) is ideal with existing fixture, saving 50-70% installation time and labor cost. Aleddra single-ended LED T8 is perfect to go with new fixtures that are properly pre-wired for LED T8. Both types of lamps are **UL 1598C** classified and come with a 5-year warranty (50,000 hours). Specifications of Aleddra LED T8 lamps are available [here](#).
